# Introduction

## Company overview

1

Adaptaflex flexible conduit systems are used to protect critical power and data cabling. Established in 1972 Adpataflex has developed into a leading player within the flexible conduit market.

Adaptaflex is one of the market leading flexible conduit system brands that can be found all over the world. Combining innovative design with dedicated manufacture it offers customers one of the world's broadest ranges of cable protection products and solutions. With a choice of over 6000 products the range covers metallic and non-metallic flexible conduit systems for the protection of critical power and data cable.

The system solutions from Adaptaflex need to perform in a wide variety of environments from high temperature to freezing subzero conditions. The products are designed and tested to withstand constant vibrations, water ingress, offer corrosion resistance and are available in halogen free, low smoke and low toxicity materials. An extensive range of engineered solutions are designed to withstand the rigours of some of the most technically demanding markets. So whatever your project involves our experience will provide the answer helping you to specify the correct flexible conduit system.

### Markets and industries

Adaptaflex flexible conduit systems are used to protect critical power and data cabling throughout a wide range of markets including:

- Commercial contracting
- Machinery
- Rail / Infrastructure
- Marine
- Mechanical
- Security / CCTV
- Data cabling
- Critical power

Our products are designed and engineered to meet a variety of market application requirements, providing product innovation, saving installation and component costs, improving the quality and the integrity of the end product.

# Introduction

## Quality approvals

1

### Quality approvals

The company's commitment to independent testing across a wide range of applications has led to an impressive range of certifications and quality approvals:

- BSI Kitemark
- BS EN ISO14001 Environmental standard
- IEC 616386 Conduit standard covering the performance characteristics of flexible conduits
- Lloyds Register of shipping type approval for its non-metallic PR, PK and metallic LFH-SP and SPL products way back in 1995
- IP69K, DIN 40050, standard with its Adaptalok range of non metallic fittings
- Offer non-metallic conduit that is fully compliant to the new dual listed UL 1696 standard. Required for any equipment destined for export to the USA and Canada
- The Hi-Spec PEEK range, designed for the most demanding electrical applications in rail infrastructure, underground and public buildings, is the only non-metallic flexible conduit system fully compliant with both BS6583 Class 1A requirement and LUL engineering standard 1-085

### Industry standards

As one of the worlds leading flexible conduit system manufacturers, Adaptaflex has achieved many international approvals, for our manufacturing as well as our product ranges.

Adaptaflex are able to use our experience and knowledge to ensure safety and quality levels are maintained now and in the future.

# Introduction

## Third party testing & approvals

1

KM35161

### Third party testing & approvals

#### IEC61386 Performance classification standard

Adaptaflex has achieved third party accreditation to the IEC61386 Standard from the British Standards Institution (BSI). IEC61386 conformance guarantees that products meet performance specifications for fatigue life, operating temperature, non-flame propagation, IP ratings amongst other criteria.

#### BSI Kitemark

Adaptaflex manufacturer to third party accreditation through the BSI Kitemark scheme. The Kitemark is one of the world's premier symbols of trust, integrity and quality. Manufacturers with the Kitemark are an elite club of some of the world's best companies being annually tested to ensure continued compliance. Having the Kitemark associated with our products illustrates that we have satisfied the most rigorous of quality processes.

#### ISO9001 Quality standard

Adaptaflex conform to ISO 9001:2000, the internationally recognised standard for Quality Management Systems. This standard reflects the procedures and management processes throughout the whole of the company.

#### BS EN ISO14001 Environmental standard

Controlling the impact of manufacturing activities on the environment is a major challenge. Again Adaptaflex lead the way by being the first conduit manufacturer to comply with this Standard.

We also meet the requirements of EU directive 2002/95/EC on the restriction of the use of certain hazardous substances (RoHS). This forms part of the legislation on waste management and is aligned with the waste electrical and electronic equipment (WEEE). Specifically no lead, mercury, cadmium, hexavalent chromium; polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE) are used in the manufacture of metallic and non-metallic flexible conduit systems.

#### Customer support

All our products are backed up by full technical support team, sales teams, customer care team and in-house marketing specialists. All dedicated teams working together to ensure that you have the best of support in the market place.

# Applications

## Construction applications

1

KM35161

### Construction overview

In these environments there are ever increasing demands not only for quicker and easier to install solutions but also for increased safety and technical performances to meet the specific needs of municipal buildings. The ability to offer product ranges with enhanced low fire hazard properties for safety or overbraiding for security and EMI shielding.

Where exposed interiors call for design consideration there is a choice such as conduit in different colours such as white or indifferent materials such as stainless steel to complement interior styling - Adaptaflex have a range to suit.

### Typical Applications:

- Office buildings
- Schools
- Hospitals (EMC)
- Retail developments
- Leisure complexes / Sports stadiums

### Industry approved

Adaptaflex products are approved by a range of recognised industry standards including:

- BSI Kitemark to IEC61386
- CE marked to the Low Voltage Directive
- Fully compliant to BS7671 Wiring Regulations code of practice

### Product recommendation

- Low fire hazard PA conduit systems
- Adaptalok fittings
- LFH-SP Liquid resistant covered flexible steel conduit systems enhanced low fire hazard

# Applications

## Machinery applications

1

### Machinery overview

This market is driven by the needs to meet the best in lean manufacturing. To achieve this every piece of equipment in this sector is pushed for greater efficiency by working more intensely and faster. As a result any conduit installed in these applications will need to provide excellent mechanical strength, flexibility and abrasion resistance in order to supply the best possible solution to provide protection along the entire length of all the moving parts.

In this hardworking environment of both dynamic and static applications, it is essential that any cable management products continue to deliver performance in areas where resistance to oils and chemicals is paramount. Any down time in manufacturing can be very costly so products that can offer high ingress protection are fundamental and Adaptaflex can offer a wide range of solutions to meet all of these needs.

Technology is increasingly being used in modern machine tools and the need to interface conduit to multipin-connectors is escalating. Nylon systems continue to gain popularity in this sector due to their excellent performance, flexibility and low installed cost benefits. For this reason Adaptaflex has developed a wide range of liquid tight connector interfaces in the Adaptalok range.

### Typical Applications:

- Metal cutting and fabrication
- Milling machines
- CNC machine tool technology
- Moulding machinery
- Security & CCTV
- Robotics

### Industry approved

Adaptaflex products are approved by a range of recognised industry standards including:

- BSI Kitemark to IEC61386
- CE marked to the Low Voltage Directive
- Fully compliant to BS7671 Wiring Regulations code of practice
- UL / CSA
- UR

### Product recommendation

- SPL liquid tight conduit systems
- PA conduit systems
- SPUL for machinery
- USA export
- Overbraided conduit systems
- SPLHC conduit systems
- PI conduit systems
- Adaptaring fittings
- PADL conduit systems
- ATS fittings

# Applications

## Rail infrastructure applications

SIEMENS

### Rail overview

For more than 30 years we have worked with the foremost manufacturers and suppliers of public transportation systems throughout the world. We understand not just the Standards that you need to work to, but also the Industry issues that you face including your customer service delivery expectations.

Our systems need to perform in a wide variety of environments from high temperature to freezing subzero conditions. Our products can withstand constant vibrations, water ingress, offer corrosion resistance and are available in halogen free, low smoke and low toxicity materials. If your project involves rail stations, infrastructure, signalling, tunnels, surveillance or data and information systems our experience will provide the answer helping you to specify the correct flexible conduit system.

### Typical Applications:

- Infrastructure projects - Stations, tunnels, signalling
- Low fire hazard systems
- Exposed Locations
- High impact resistance, low temperature flexing
- EMC Protection for safety critical systems
- OEM packages

### Industry approved

Adaptalox products are approved by a range of recognised industry standards including:

- LUL 1-085
- NF F 16-101/102
- Deutsche Bahn (DIN 5510)
- BS6853
- Siemens Transportation
- BSI Kitemark to IEC61386
- CE marked to the Low Voltage Directive
- EN 45545-2

### Approvals & standards

- PA conduit systems
- PR enhanced low fire hazard conduit systems
- PF conduit systems
- PK conduit systems
- LFH-SP conduit systems
- CP conduit systems
- IP66/67/68/69k Adaptalok / ATS fittings
- Overbraided systems

# Applications

## Marine applications

1

KM35161

### Marine overview

Safety and reliability are vital considerations within one of the harshest operational environments to be found. Products specified and installed within this sector have to face the particular damaging effects from the wind, wave and salt spray conditions in exposed areas. Whilst this demands for the most robust of products it also calls for solutions where vibration and temperature extremes add to the challenge.

Adaptaflex offer a broad range of solutions to suit this sector which are abrasion, impact, corrosion and chemical resistant, offering long service life and low fire hazard properties. Utilising Adaptalok sealing systems also offers ingress protection particularly valuable in pressure washing applications and with our specialist insert seal raises the IP rating from IP66 to IP67/68/69K.

#### Typical Applications:

- Ship / Boat engine rooms
- Ship and dock yards
- Leisure boats and cruisers
- Marina developments
- Ocean going craft

### Industry approved

Adaptaflex products are approved by a range of recognised industry standards including:

- Lloyds Register type approved
- UR
- BSI Kitemark to IEC61386
- CE marked to the Low Voltage Directive

### Product recommendation

- PA conduit systems
- PR conduit systems
- IP66/67/68/69k Adaptalok ATS™ systems
- Adaptaseal systems
- Stainless steel conduit systems
- SPL conduit systems
- LFH-SP conduit systems

# Applications

## Mechanical applications

1

### Mechanical overview

Adaptaflex offers a range of products suited for this market, providing abrasion, impact and corrosion resistance and ingress protection. Additionally, Adaptaflex offers a range of high specification systems, braided EMI screen options.

Adaptaflex Applications Engineers offer a breadth of experience gained internationally across all different market sectors. A bespoke design service and expert technical knowledge guarantees that Adaptaflex will find the perfect product solution for your application.

Examples of individual markets served:

- Hoists
- Cranes
- Lifts
- Escalators

### Industry approved

Adaptaflex products are approved by a range of recognised industry standards including:

- BSI Kitemark to IEC61386
- CE marked to the Low Voltage Directive
- Fully compliant to BS7671 Wiring Regulations code of practice
- UL / UR
- CSA

### Product recommendation

- SPL liquid tight conduit systems
- PA conduit systems
- Overbraided conduit systems
- Stainless steel conduit systems
- SPLHC conduit systems
- PI conduit systems
- Adaptaring fittings
- ATS fittings

# Non-metallic conduit systems

## Introduction

### Range overview

Adaptaflex have more than 20 different types of non-metallic conduit systems all providing different technical properties for your cable management applications.

2

Our Conduit range is available in many different materials, ranging from lightweight to heavyweight with nominal conduit sizes from 10mm right up to the Jumbo size of 106mm.

For more demanding applications, there is a wide-ranging high specification series of conduit with enhanced low fire hazard properties, EMI screening and incorporating high fatigue life. Overbraided options are available for use in abrasive environments.

Standard product is manufactured in a wide range of materials. The corrugated construction provides good flexibility and low weight. Additionally, a range of fittings are specifically designed to maintain system integrity including the popular and easy to fit Adaptalok system. Fitting types are available in straight, 90°, 45°, with metric, PG, PF, & NPT threads.

#### Advantages:

- Non metallic conduits do not corrode (rust)
- Wider variety of fittings - much larger solutions choice
- Quicker to install (cut & assemble fittings)
- Lighter in weight
- Better fatigue life
- Return to shape

Many of our conduit systems have industry recognised approvals including British Kitemark, CE Approval, UL 1696, NF, LUL, DB, Lloyds Register amongst others.

Push-in  
Straight Fitting

### Push-in - Adaptalok

**Straight Fitting** / Inserts into a 20mm knockout, panel thickness up to 4mm, no locknut required

**Materials:** Polyamide (Nylon) 66 / **Colour:** Black (BL), Grey (GR)

Part No.	Nominal Conduit Size
AL16/KM20/A	16mm
AL21/KM20/A	21mm

To order quote part number & body colour, e.g. AL21/KM20/A/BL

#### Approvals

# Non-metallic conduit systems

## 3-Way Coupler & Insert Seal - Adaptalok

3-Way Coupler  
3-Way PA66 Fitting

2

### 3-Way Coupler - Adaptalok

**3-Way PA66 Fitting** / For coupling three corrugated flexible conduits

**Materials:** Polyamide (Nylon) 66 / **Colour:** Black (BL), Grey (GR)

Part No.	Nominal Conduit Size Combination	
AL131010/Y	13x10x10mm	
AL161313/Y	16x13x13mm	
AL211616/Y	21x16x16mm	
AL282121/Y	28x21x21mm	

To order quote part number & body colour, e.g. AL131010/Y/BL

### Approvals

Insert Seal  
IP67/68/69k Insert Seal

### Insert Seal - Adaptalok

**IP67/68/69k Insert Seal** / Suitable for standard weight PA/PI/PR conduit (Black or Grey)

**Materials:** Thermoplastic Elastomer / **Colour:** Yellow (Y) Only

Part No.	Conduit Pitch	
ALS13/F	Fine	
ALS16/F	Fine	
ALS21/F	Fine	
ALS28/C	Coarse	
ALS34/C	Coarse	
ALS42/C	Coarse	
ALS54/C	Coarse	

To order quote part number, e.g. ALS13/F

Note: Seal needs to be inserted into the appropriate conduit to upgrade fitting system

### Approvals

# Non-metallic conduit systems

## Type FL/A, FL/C90 & FL/90 - Adaptalok

2

Type FL/A  
Straight Panel Mounting  
Swivel Flange

### Type FL/A - Adaptalok

**Straight Panel Mounting Swivel Flange** / With integral face seal

**Materials:** Polyamide (Nylon) 66 / **Colour:** Black (BL), Grey (GR)

Part No.	Nominal Conduit Size
AL16/FL/A	16mm
AL21/FL/A	21mm
AL28/FL/A	28mm
AL54/FL/A	54mm

To order quote part number & body colour, e.g. AL16/FL/A/BL

#### Approvals

#### Temperature Range

Static Applications: -50°C to +120°C

Moving Applications: -45°C to +120°C

#### Fitting Characteristics

Type FL/C90  
90° Elbow Body

### Type FL/C90 - Adaptalok

**90° Elbow Body - Panel Mount Swivel Flange** / For panel mounting via 2 hole fixing & integral face seal

**Materials:** Polyamide (Nylon) 66 / **Colour:** Black (BL), Grey (GR)

Part No.	Nominal Conduit Size
AL13/FL/C90	13mm
AL16/FL/C90	16mm
AL21/FL/C90	21mm
AL28/FL/C90	28mm

To order quote part number & body colour, e.g. AL13/FL/C90/BL

Type FL/90  
90° Elbow Fitting

### Type FL/90 - Adaptalok

**90° Elbow Fitting - Panel Mount Flange** / For panel mounting via 4 hole fixing & integral face seal

**Materials:** Polyamide (Nylon) 66 / **Colour:** Black (BL), Grey (GR)

Part No.	Nominal Conduit Size
AL34/FL/90	34mm
AL42/FL/90	42mm
AL54/FL/90	54mm

To order quote part number & body colour, e.g. AL34/FL/C90/BL

#### Approvals

#### Temperature Range

Static Applications: -50°C to +120°C

Moving Applications: -45°C to +120°C

#### Fitting Characteristics (FLC/90 ONLY)

# Non-metallic conduit systems

## Type FL/45 & Swivel Coupler - Adaptalok

Type FL/45  
45° Panel Mounting Swivel Flange

2

### Type FL/45 - Adaptalok

45° Panel Mounting Swivel Flange / With integral face seal

**Materials:** Polyamide (Nylon) 66 / **Colour:** Black (BL), Grey (GR)

Part No.	Nominal Conduit Size	
AL16/FL/45	16mm	
AL21/FL/45	21mm	
AL28/FL/45	28mm	
AL54/FL/45	54mm	

To order quote part number & body colour, e.g. AL16/FL/45/BL

### Approvals

NF

### Temperature Range

Static Applications: -50°C to +120°C

Moving Applications: -45°C to +120°C

### Fitting Characteristics

Swivel Coupler  
Straight PA66 Body Swivel Coupler

### Swivel Coupler - Adaptalok

Straight PA66 Body Swivel Coupler / For coupling two corrugated flexible conduits

**Materials:** Polyamide (Nylon) 66 + Aluminium / **Colour:** Black (BL) Only

Part No.	Nominal Conduit Size	
AL13/A/U/BL	13mm	
AL16/A/U/BL	16mm	
AL21/A/U/BL	21mm	
AL28/A/U/BL	28mm	
AL34/A/U/BL	34mm	
AL42/A/U/BL	42mm	
AL54/A/U/BL	54mm	

To order quote part number, e.g. AL13/A/U/BL

### Approvals

Sealing Kit

#### Jumbo Type SK

**Sealing Kit** / For use with Jumbo fittings to achieve IP65. Consists of two sealing washers & O-ring per kit

**Materials:** Rubber / **Colour:** Black (BL) Only

Part No.	Nominal Conduit Size
SK80	80mm
SK106	106mm

To order quote part number, e.g. SK80/BL

# Non-metallic conduit systems

## Introduction to Adaptalok ATS™

2

Adaptalok ATS™ represents a unique and innovative solution in flexible conduit systems. Until now, manufacturers have produced fittings and seals separately, and assembled them together, or had the customer assemble them. This increases assembly time and introduces the possibility for errors.

Adaptalok ATS™ uses a sophisticated moulding process to mould an internal conduit seal and a face seal washer. This makes installation times very fast, and extremely reliable, because the seals cannot be left out. The conduit system also benefits from the highest IP rating possible.

Additional key features:

- Nylon 66 Body
- Lighter in weight
- Quicker to install (cut & assemble fittings)
- Wider variety of fittings - much larger solutions choice
- Better fatigue life
- Return to shape

# Non-metallic conduit systems

## Accessories - Type GZ, EC & RT

Type GZ  
End Sleeves

2

### Type GZ

**End Sleeves** / For sealing cables to non-metallic conduit

**Materials:** Rubber / **Colour:** Black (BL) Only

Part No.	Nominal Conduit Size
GZ9	13mm
GZ11	16mm
GZ13	21mm
GZ21	28mm
GZ29	34mm
GZ36	42mm

Type EC  
End Caps

### Type EC

**End Caps** / Provides a smooth finish to conduit preventing any damage to cables when not terminated with a fitting

**Materials:** Acetal (POM) / **Colour:** Black (BL) Only

Part No.	Nominal Conduit Size
ECB13	13mm
ECB16	16mm
ECB21	21mm
ECB28	28mm
ECB34	34mm
ECB42	42mm
ECB54	54mm

Type RT  
Adaptalok Removal Tool

### Type RT

**Adaptalok Removal Tool** / To provide easy removal of Adaptalok & ATS Fittings

**Materials:** Polyamide (Nylon) 6 / **Colour:** Black (BL) Only

Part No.	Adaptalok Fitting Size
AL13RT	13mm
AL16RT	16mm
AL21RT	21mm
AL28RT	28mm
AL34RT	34mm
AL42RT	42mm
AL54RT	54mm

NOTE: For a 13-34mm set use part number ALRTSET

# Non-metallic conduit systems

## Accessories - Type MB

2

Type MB  
Manifold Box

### Type MB

**Manifold Box - Multiway Adapters** / Non metallic enclosure which can be machined to take upto eight Adaptalok ATS™ fittings

**Materials:** Polyamide (Nylon) 66/TPE / **Colour:** Black (BL) Only / Yellow (Y) Elastomer

Part No.	External Dimensions Lid (mm) Dia X Height	External Dimensions Fixing Lugs (mm)	Max Threaded Entry Per Face
MB21	100 x 40	120	M20
MB34	136 x 55	155	M32

To order quote part number, body colour & Elastomer colour, e.g. MB21/BLY

Non metallic enclosure which can be machined to take upto eight Adaptalok ATS™ fittings (or other devices) in a variety of configurations and sizes, e.g. 'Y', 'T', 'X', 'V' etc.

Each box has a removable cover for ease of access. The box seal is moulded, so remains captive. Each manifold is provided with eight blank sides which require drilling/machining to suit the application. Manifolds can be supplied ready drilled to order, subject to minimum order quantities. Threaded fittings with locknuts can be used in each entry.

# Metallic conduit systems

## Conduit, fittings & accessories

### Metallic Conduit Systems

Quick selection guide	3/2
Introduction	3/5

### Adaptasteel Steel Conduit & Fittings

Type S - Galvanised Steel Conduit	3/6
Type SS - Stainless Steel Conduit	3/6
Type A - Nickel Plated Brass Fitting	3/7
Type B - Nickel Plated Brass Fitting	3/7
Type F - Nickel Plated Brass Fitting	3/8
Type C - Nickel Plated Brass Fitting	3/8

### Adaptasteel Liquid Resistant Conduit & Fittings

Type SP - L/R General Purpose Conduit	3/9
Type SN - L/R Abrasion & Solvent Resistant Conduit	3/9
Type LFH-SP - L/R Enhanced Low Fire Hazard Conduit	3/10
Type A - Nickel Plated Brass Fitting	3/10
Type B - Nickel Plated Brass Fitting	3/11
Type C90 - Nickel Plated Steel Fitting	3/11
Type M - Nickel Plated Brass Fitting	3/12
Type F - Nickel Plated Brass Fitting	3/12
Type C - Nickel Plated Brass Fitting	3/13
Type E - Nickel Plated Brass Fitting	3/13

### Adaptasteel Liquid Tight Conduit & Fittings

Type SPL - L/T Oil Resistant	3/14
Type LFH-SPL - L/T Low Fire Hazard	3/14
Type SPL-EF Enhanced Fire Performance <b>NEW</b>	3/15
Type SPLHC - L/T Extreme Temperature	3/16
Type SPUL - L/T UL Listed & CSA Approved	3/17
Type A - Nickel Plated Brass Fitting	3/17
Type B - Nickel Plated Brass Fitting	3/18
Type E - Nickel Plated Brass Fitting	3/18
Type M - Nickel Plated Brass Fitting	3/19
Type C90 - Nickel Plated Steel Fitting	3/20
Type 45 - Nickel Plated Brass Fitting	3/20

### Adaptasteel Specialist EMI Screen Conduit & Fittings

Type SB - Specialist EMI Screen Conduit	3/21
Type STC - Specialist EMI Screen Conduit	3/21
Type SSB - Specialist EMI Screen Conduit	3/22
Type SSBGS - Specialist EMI Screen Conduit	3/22
Type A - Nickel Plated Brass Fitting	3/23
Type B - Nickel Plated Brass Fitting	3/23

### Adaptasteel Specialist Liquid Resistant Conduit & Fittings

Type SPB - Specialist Liquid Resistant Conduit	3/24
Type SPTC - Specialist Liquid Resistant Conduit	3/24
Type A - Nickel Plated Brass Fitting	3/25
Type B - Nickel Plated Brass Fitting	3/25

### Adaptasteel Specialist Liquid Tight Conduit & Fittings

Type SPLHCB - Specialist Liquid Tight Conduit	3/26
Type A - Nickel Plated Brass Fitting	3/26
Type B - Nickel Plated Brass Fitting	3/27

### Metallic Accessories

Type LNB/LNS - Metallic Locknut	3/28
Type P - P-Clip Conduit Support	3/28
Type PSA - Proximity Switch Connectors	3/28
Type 90/45 - Brass Elbows	3/29
Type TC - UNEF Thread Converters	3/29
Female Coupler	3/29
Type E, R & TC - Enlargers, Reducers & Converters	3/30

# Metallic conduit systems

## Introduction

### Range overview

Adaptaflex have a wide selection of metallic conduits and metallic conduit systems manufactured either in galvanized steel or stainless steel.

A wide range of different conduit types provide a solution for liquid resistant specifications, with further conduit options in liquid tight covered steel conduit for especially demanding environments. Conduit ranges are offered in nominal conduit size from 3mm for CCTV/roller shutter doors and for protecting fibre optics cables right up to 75mm for larger cable carrying capacity.

Overbraided conduits are particularly suitable for installation in abrasive environments. Where applications call for enhanced low fire hazard properties or EMI screening then there is the option of high specification tinned copper overbraided for greater EMI protection levels.

In addition a range of fittings are specifically designed to maintain system integrity including fixed and swivel fittings, straights, 90°, 45°, and a host of accessories including locknuts, enlargers, reducers and converters.

Many of our conduit systems have industry recognised approvals including British Kitemark, CE Approval, UL 1696, NF, LUL, DB, Lloyds Register amongst others.

#### Advantages:

- High compression/crush strength
- Tensile strength - pull off load under tension
- Impact resistance
- Inherent fire protection on uncoated versions
- Corrosion resistant - stainless steel options
- Braided - High level EMI screening with tinned copper overbraided

## Type S & SS - Adaptasteel

**Type S**  
Inherent Low Fire Hazard  
Steel Conduit

3

### Type S - Adaptasteel

Inherent Low Fire Hazard Steel Conduit / Materials: Galvanised Steel - General Purpose

Part No.	Nominal Conduit Size	Outside Diameter	Inside Diameter	Min. Bend Radius	Reel Length
S10	10mm	9.1mm	7.0mm	25mm	25, 50m
S12	12mm	13.0mm	10.3mm	30mm	10, 25, 50m
S16	16mm	16.0mm	13.0mm	35mm	10, 25, 50m
S20	20mm	20.5mm	16.9mm	45mm	10, 25, 50m
S25	25mm	25.0mm	21.4mm	55mm	10, 25, 50m
S32	32mm	32.0mm	28.1mm	60mm	10, 25m
S40	40mm	42.5mm	37.7mm	80mm	10, 25m
S50	50mm	53.0mm	48.4mm	90mm	10, 25m
S63	63mm	62.5mm	57.5mm	115mm	10m
S75	75mm	77.0mm	70.0mm	150mm	10m

To order quote part no, & reel length, e.g. S12/25M

#### Approvals

**Type SS**  
Inherent Low Fire Hazard  
Stainless Steel Conduit

#### IP Rating

#### Appropriate Fitting

#### For use with:

IP40	Type S - Type A, B, F & C

# Metallic conduit systems

## Type SPL-EF - Adaptasteel

The NEW SPL-EF conduit systems are Enhanced Fire Performance rated, highly flexible, liquid tight with a wide temperature operating range.

Designed to meet the demand for 'interoperability' and compliance with stringent local and European fire safety requirements in the rail infrastructure market, the SPL-EF system, is accredited with the EN45545-2 standard achieving the highest HL3 fire performance rating for both interior and exterior locations.

The system provides higher performance levels of flexibility, impact and abrasion resistance, combined with enhanced chemical resistances especially to oils and greases, with a much higher and lower temperature rating (-40°C to +105°C), than any other metallic conduit system with a EN45545-2 HL3 rating.

Advantages include:

- EN45545-2 and BS EN 61386-1 & 23 accreditation
- HL3 - R22 & R23 rating
- Up to IP69K rating
- High flexibility
- Oil and hydrocarbons resistant
- Suitable for wide use underground and in any part of train vehicles and infrastructure

Type SPL-EF

Kwikcut cutting tool

### Kwikcut

#### Part No.

KWIKCUT

### Kwikcut

Kwikcut is the ideal cutting tool for non-metallic conduits (PA, PF, PI, PR, PADL, CP, KFL, KFS, KFM, PP, XF & PK) up to 32mm.

### Instructions

Place the conduit between the cutting blade and lower support, squeeze the handles and rotate the conduit for a clean, easy cut. Spare blades are available.

Swingcut cutting tool

### Swingcut

#### Part No.

SWINGCUT

### Swingcut

Swingcut is a versatile vice and saw combination tool which facilitates a neat, square cut for liquid tight and pliable conduits between 10mm and 32mm. Six to one leverage advantage provides a strong cutting action.

### Instructions

Place the conduit in the vice and secure. Move the operating handle backwards and forwards whilst applying increasing pressure to the supporting handle.

Hardened captive spring loaded retaining pins make blade replacement easy. Spare blades are available.

# Cutting Tools

## Cut-Vice & Rotocut

Cut-Vice cutting tool

### Cut-Vice

#### Part No.

CUT-VICE

### Cut-Vice

Cut-vice offers the ability to produce a clean cut for conduit sizes 16mm to 40mm.

#### Instructions

Place the conduit along the vice body and tighten the clamp. Holding the conduit and integral handle together, insert a hacksaw blade into the guide and cut. For braided conduit, wrap adhesive tape around the cutting point to secure braid. Remove tape after cutting.

Rotocut cutting tool

### Rotocut

#### Part No.

ROTOCUT

### Rotocut

Rotocut offers a simple but effective method for cutting 20mm and 25mm S, SS, SP, LFH-SP and SN steel conduit types.

#### Instructions

Adjust the clamping pin so that the conduit is just held in the recess. Squeeze the lever and body whilst rotating the cutting blade. When the blade appears on the inside of the conduit, release the pressure and remove the conduit. A simple twist will then separate the two parts. Where the conduit is covered, the covering can be cut prior to separation. Spare blades are available.

# Cable glands & terminal blocks

## Introduction

### Range overview

Incorporating high quality design and manufacture, products include cable glands and terminal blocks.

#### Cable Glands

Cable Glands provide sealing and retention for a wide range of cables for general indoor and outdoor applications.

The Standard Range of "Hex" cable glands has been widely recognised as the UK "Industry Standard" for plastic cable glands for over 30 years offering excellent all-round performance. Euro Index is the next generation of Cable Glands with enhanced IP and load functionality. Also available is the Index Cable Gland range providing high strength and performance for a variety of applications. A range of accessories are available including seals, grommets, metric adaptors and reducers, locknuts and sealing washers.

The range of terminal blocks is now available in standard 12-pole options. The terminal blocks are moulded from a specially developed Polyamide 6/66 Copolymer, which meets the arduous glow wire tests as specified in International Standard IEC 60695-2-11 and IEC 60695-2-12. Available in a range of size's, terminal blocks are ideal for use in appliances, lighting, industrial, domestic, and commercial applications and the white terminal blocks are available with raised or level base options.

#### Terminal Blocks

The general purpose 12 pole products are competitively priced, polyethylene terminals blocks that offer flexibility, versatility, are neutrally coloured and come with CE Approval. Available in 3, 5, 15 and 30 Amp loads they are easily cut into the required number of poles and can be mounted on a surface within an enclosure.

The Index Claw Gland is suitable for many applications where cables are subject to high tensile loads. Typical applications would range from portable equipment such as generators to highly mobile factory equipment. The performance of the Index Claw Gland allows for IP68 rating at 5 bar and cable anchorage of 15.9kgs

The INDEX Uni Iris range of cable glands are for use with screened cable and have been designed to connect the screen of the cable to the enclosure screening system. This is achieved by the use of two tapered rings applying force onto a continuous stainless steel spring washer pressing against the screen, ensuring positive contact. Assembly is simple, the screen is exposed, the spring and washers are slipped in place and then the gland can be tightened.

Approvals	IP Rating	Temperature Range	Halogen Free
	IP68	Yes (10 bar 30min) Static Applications: -40°C to +135°C	Yes

#### Key Features

- Screen continues into enclosure
- IP68 Protection at 10 bar for 30 minutes
- Metric
- For use with systems conforming to EN50 082-1/2

#### Type A

- Stripped Cable Sheath - Allowing the outer sheath to be completely stripped from the cable

#### Type B

- Continuous Cable Sheath - Allowing for a ring of outer sheath only to be stripped

In-Line Aqua-safe	7/4
Bulkhead Aqua-safe	7/4
Sealing Caps	7/5

# Aquasafe

## Introduction

### Range overview - In-Line (IP68 - 16A)

The in-line range is typically used where temporary connections are required for power. The range offers a variety of cable acceptances sizes, whilst maintaining a compact working envelope.

Aquasafe is suitable for temporary immersion to IP68 2 Bar for 30 minutes (Note: Not submersible). The housings are defined as either Female or Male. The Female housing has the collar moulding, and the Male housing is smaller in diameter, and fits inside the opposite housing. The inner connectors are defined as either a Plug or Socket according to the metal inserts.

#### Bulkheads (IP68 - 16A)

If power is being distributed and controlled from a fixed installation, it may be more appropriate to mount products into an enclosure or electrical equipment. As an alternative to the in-line connector, Adaptaflex offer complimentary mounting options including;

- **Chassis / panel mounting** (screwed)  
Supplied with M25 Locknut and Sealing Washer as standard, the thread has flats to orientate the housing during installation.
- **Bulkhead / surface mounting** (flanged)  
Flanged to suit surface mounting where space is restricted behind the application.

Each bulkhead / panel mounted housing can be used in conjunction with the appropriate mating in-line connector.

IEC 61984

#### Sealing Caps (IP68)

Sealing caps can be fitted to each individual housing to maintain protection when the connectors are separated. This ensures electrical safety at all times, even when the connectors are not in use. The caps are operated in exactly the same manner as the connectors, by the latch mechanism held within the collar. A strap is also provided to retain the sealing cap onto the housings, for light static applications.

# Technical section

## EMI screen system & fire performance

### EMI Screen System

For applications where electromagnetic interference is of particular concern we have classified suitable conduit systems by means of symbols. These are related in an ascending scale of performance from Standard EMI Screen (products featuring a stainless steel overbraid) through to High EMI Screen (products featuring a tinned copper overbraid). Contact us for full details.

**Standard  
EMI Screen**

Screening Level  
40db @ 100MHz

**Enhanced  
EMI Screen**

Screening Level  
60db @ 100MHz

**High  
EMI Screen**

Screening Level  
75db @ 100MHz

### Fire Performance

Adaptaflex has introduced a set of symbols to help the user specify conduit systems for installations where fire performance is of particular concern.

Each symbol encompasses a range of properties relevant to the high specification materials used in the construction of the conduit.

They are in an ascending scale of performance from Low Fire Hazard (LFH) featuring zero halogen through to Super Low Fire Hazard (SLFH) featuring zero nitrogen. In addition, Inherent Low Fire Hazard systems (ILFH) are classified as being all metal systems.

**Low  
Fire Hazard**

**Enhanced Low  
Fire Hazard**

**Super Low  
Fire Hazard**

**Inherent Low  
Fire Hazard**

Property	LFH	ELFH	SLFH	ILFH
Oxygen Index ISO4589	$31\% \geq OI \geq 28\%$	$OI \geq 32\%$	$OI \geq 32\%$	Inherent Low Fire Hazard
BS6853 Smoke Density 3m <sup>3</sup>	$0.02 \geq A_0 \geq 0.03$	$0.005 \geq A_0 \geq 0.02$	$0.02 A_0 \leq 0.005$	i.e. Type S, SS, SPB STC, SSB & SSBGS
Zero Halogen	•	•	•	Metallic Conduit
Zero Phosphorus	•	•	•	
Zero Sulphur	•	•	•	
London Underground	Concession	Approved	Approved	& Fittings
Toxicity Index NES713 Issue 3	$5.0 \geq TI \geq 6.0$	$0.5 \geq TI \geq 5.0$	$TI \leq 0.5$	
NFF16-102	I3F2	I2F2	I2F1

## IP ratings & fitting characteristics

### IP Ratings

IP suitability ratings are a system for classifying the degree of protection provided by enclosures of electrical equipment.

#### Protection against Solid Bodies

Degree of protection for persons against access to hazardous parts inside the enclosure and/or against the ingress of solid foreign objects.

		Protection against Solid Bodies		Protection against Water
	0	No protection		0 No protection
	1	Objects greater than 50 mm, accidental touch by hands		1 Protected against vertically falling drops of water
8	2	Objects greater than 12 mm, accidental touch by fingers		2 Protected against direct sprays of water up to 15° from vertical
	3	Objects greater than 2.5 mm, e.g. tools/wires		3 Protected against sprays of water to 60° from vertical
	4	Objects greater than 1 mm, e.g. tools/wires/small wires		4 Protected against water sprayed from all directions - limited ingress permitted
	5	Protected against dust - limited ingress (no harmful deposits)		5 Protected against low pressure jets of water from all directions - limited ingress permitted
	6	Totally protected against dust (Dust-tight)		6 Protected against strong pressure jets of water, heavy seas - limited ingress permitted
	7			7 Protection against the effects of immersion between 15cm - 1 m
	8			8 Protection against long periods of immersion under a quoted pressure, e.g. 2 bar at 24 hours
	9			9 IP69k Automotive standard DIN40050 and signifies resistance to high pressure jets of water (up to 80bar) from any angle

## IP Ratings

The higher the number, the greater the degree of protection; they apply ONLY to properly installed equipment.  
The numerals stand for the following:

## Fitting Characteristics

Fitting swivels independently of conduit for installation purpose but is not suitable as a rotating joint in constantly moving applications.

Fitting rotates independently of the conduit to act as a rotating joint within constantly moving applications.

**Note**

The information above is given as a guide only and is based on published technical data and experience.

The chemical resistance of the above products is dependant on factors such as chemical exposure, concentration of the chemical and temperature. The above chemicals are valid for a temperature of 23°C.

Use of the above table is at the users own discretion and risk. Those using it must satisfy themselves that their application presents no health and safety risks.

The end user should assess compatibility with their application and contact Adaptaflex for further information.

# Technical section

## Cable carrying capacity (wire fill)

### Introduction

UK Wiring regulations BS7671 recommend that the total cross sectional area of the sum of individual cables shall not exceed 40% of the cross sectional area of the conduit based on using 3 or more cables. The tables below enable you to calculate the number of conductors that can be run within a piece of flexible conduit.

### Instructions

- **Step 1:** Establish the number and size of each wire to be run in the conduit
- **Step 2:** Look on the Cross Sectional Area (CSA) chart (table 1), look up the CSA taken up by each of the wires from STEP 1
- **Step 3:** Add all the CSA values together (Total CSA)
- **Step 4:** Look on the conduit fill value chart (table 2).
- Choose a conduit with a 40% fill value higher than the total CSA from STEP 3

**Table 1 - Cross Sectional Area (CSA) Chart**

Nominal Conductor Size	Number of Wires							
	1	2	3	4	5	10	15	20
1mm	6.6	13.2	19.8	26.4	33	66	99	132
1.5mm	7.6	15.2	22.8	30.4	38	76	114	152
2.5mm	9.6	19.2	28.8	38.4	48	96	144	192
4mm	14.5	29	43.5	58	72.5	145	217.5	290
6mm	18.8	37.6	56.4	75.2	94	188	282	376
10mm	29.3	58.6	87.9	117.2	146.5	293	439.5	586
16mm	40.2	80.4	120.6	160.8	201	402	603	804
25mm	63.8	127.6	191.4	255.2	319	638	957	1276
35mm	83.5	167	250.5	334	417.5	835	1252	1670
50mm	113	226	339	452	565	1130	1695	2260
70mm	149	298	447	596	745	1490	2235	
95mm	204	408	612	816	1020	2040		

**Table 2 - Wire Fill of Plastic & Metallic Conduit**

Nominal Diameter	Plastic Conduit		Metallic Conduit	
	100% Fill	40% Fill	100% Fill	40% Fill
10mm	33.2	13	25.5	10.2
13mm	72.4	29	58.1	23.2
16mm	109.4	44	83.3	33.3
18mm	158.4	63	160.6	64.2
21mm	213.8	86	243.3	97.3
28mm	369.8	148	452.4	181
34mm	602.6	241	855.3	342.1
42mm	973.1	390	1164.2	465.7
54mm	1698.2	680	1963.5	785.4
80mm	3520	1410	3473.2	1389.3
106mm	6500	2600		

### Example - What size of conduit to use?

- **Step 1:** 4 x 2.5mm conductors, 2 x 10mm conductors and 3 x 50mm conductors
- **Step 2:** The CSA of Four 2.5mm conductors is 38.4, Two 10mm conductors is 58.6, Three 50mm conductors is 339
- **Step 3:** Total of these groups is  $38.4 + 58.6 + 339 = 436$
- **Step 4:** Using Table 2 the conduit is either 54mm (680) Plastic or 50mm (465.7) Metallic

- **Note:** 42mm Plastic is 390 which is smaller than 436 therefore not recommended

The information given above relates to PA - Standard weight conduit and Adaptalok fittings or SPL with M-Type fittings. It is given in good faith and should be used only as a guide in conjunction with the relevant wiring regulations.
